REMBRANDT® Locus specific identifiers ISH detection assay

LSIs are important for identifying specific genes or genetic markers that may be involved in diseases. ISH analysis using LSIs is a powerful tool for studying genetic rearrangements and chromosomal abnormalities. The REMBRANDT® Locus specific identifiers detection assays are able to detect and localize genes.

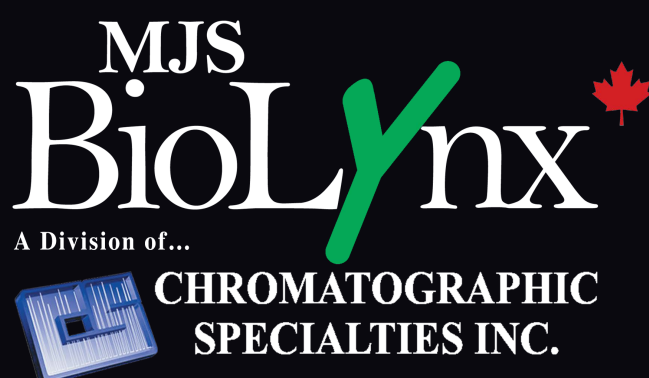

The detection of aneuploidy with locus specific identifier ISH probes has important clinical applications in various fields and can provide valuable diagnostic and prognostic information.

Product list*

LOCUS SPECIFIC IDENTIFIERS;COMPLETE KITS

CAT NR.

- REMBRANDT® LSI 3q26.2-FISH orange detection assay C730K.3000.YY**
- REMBRANDT® LSI 3q26.2-ISH detection assay C730K.XXXX.YY**
- REMBRANDT® LSI 3q26.33-FISH orange detection assay C731K.3000.YY**
- REMBRANDT® LSI 3q26.33-ISH detection assay C731K.XXXX.YY**
- REMBRANDT® LSI 3pter-FISH orange detection assay C732K.3000.YY**
- REMBRANDT® LSI 3pter-ISH detection assay C732K.XXXX.YY**
- REMBRANDT® LSI 3qter-FISH orange detection assay C733K.3000.YY**
- REMBRANDT® LSI 3qter-ISH detection assay C733K.XXXX.YY**
- REMBRANDT® LSI 4p16.3-FISH orange detection assay C734K.3000.YY**
- REMBRANDT® LSI 4p16.3-ISH detection assay C734K.XXXX.YY**

*All products are also available as stand-alone RUO products

**Available in 5 or 10 tests
