CHROMSPEC™ Inlet Liners for Agilent GCs

Economical, high quality, deactivated CHROMSPEC split/splitless injection port liners for Agilent models 5890/6850/6890/7890 GCs.

- Exceptional quality that meets or exceeds the instrument manufacturer's specifications
- Each liner is made with a proprietary deactivation process to ensure a clean, inert glass surface
- Wrapped in ultra-clean foil for enhanced liner protection and inertness
- Fully recyclable packaging

Why pay more for inlet liners from Agilent when you can expect the same liner performance for your routine GC analyses at affordable CHROMSPEC prices!
